## Pneumatic Actuator

# Designed for the highest demands

**GF Piping Systems new Pneumatic Actuator is made of high performance plastics, is maintenance free, and provides consistent performance for the life of your piping system.**

Our Pneumatic Actuators cover a wide spectrum of valves to suit every need. Thanks to its lighter, more compact design, planning and installation are easier and more efficient. The Pneumatic Actuator is protected by a high-quality, and corrosion-free fiber-glass reinforced polypropylene (PP-GF) housing, and is designed and optimized to work perfectly with a broad range of valves.

### All in one solution

The perfect valve pack. The Electro-pneumatic Positioner was tuned and tested with the Pneumatic Actuator and the Ball Valve 546 Pro. Thanks to the perfect alignment, precise flow control becomes simple. Additionally, an auto-tune function ensures quick commissioning. The Pneumatic Actuator and the Electro-pneumatic Positioner are also available for diaphragm valves type DIASTAR.
