

Axle extension for Butterfly Valves

Type 565, 567 and 578

Axle extension for Butterfly Valves

Type 565, 567 and 578

General

The axle extension for butterfly valves from GF Piping Systems offers a high degree of versatility for increasingly complex water systems. Available in custom lengths up to DN 300, the extension is ideal for applications where the valve is problematic for an operator to access. For manual versions, a lever or handwheel can be used. The extension is also suitable for applications where the valve is temporarily submerged. In such cases, the actuator is lifted out of the submerged area, allowing operation and preventing damage. For ordering information, please get in touch with Customer Service.

Standard-Features

Valve Types

Type 565 wafer-style
Type 567 wafer-style
Type 578 lug-style

Length

Depending on customer requirements

Material

316 stainless steel or coated carbon steel

Valve size

DN 50 to DN 300

Valve material/sealings

All materials, all sealings

Actuation

Electric or pneumatic
Manual operation
Lever or hand wheel with worm drive

Mount

ISO 5211
