

INNOVATION

The only **sustainable solution** for your PVC pipes.

Tangit **RAPID**
SOLVENT FREE

Quality for professionals

+GF+

*Tangit RAPID is the first solvent free PVC pipe adhesive for pressure piping systems made of PVC-U/PVC-C according to EN 14814 and EN ISO 15493. It is drinking water approved according to KTW, W270, ACS, WRAS. The 4x faster curing time and the 2x longer open time are comparable to the common Tangit adhesives.

STRONG. PROTECTING.

Henkel's sustainability aim: Using less resources but achieving more. That is why we are putting our focus on solvent free formulas without making a compromise in quality.

The development of Tangit RAPID also follows this principle: As the first solvent free PVC pipe adhesive, Tangit RAPID offers environmental friendliness while also being a high performance product. The innovative formula reduces emissions to a minimum, because Tangit RAPID contains almost 100% adhesive. Another advantage regarding sustainability: All materials and auxiliary tools can be cleaned before and after usage in a sustainable way by using ethanol based cleaners. This also works for the reusable plastic brush.

Tangit RAPID, performance delivered, sustainably.

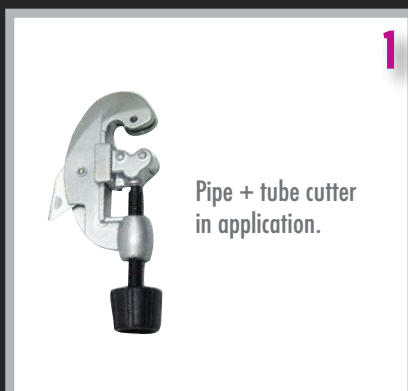

EASY. CLEAN. SAFE.

11 EASY STEPS TO ACHIEVE A PERFECT JOINT

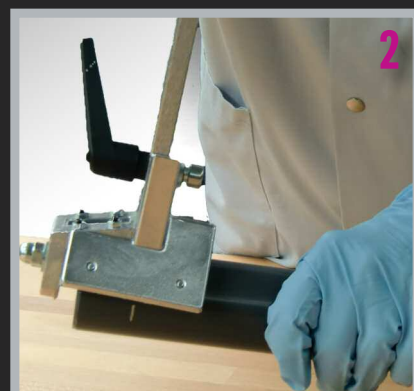

Materials and tools ...

Tube cutter
Chamfering tool
Deburrer
Tissue
Tangit PE/PP/PB/PVDF Cleaner
Gloves
Double meter stick
Soft pencil
Tangit dispenser (50 ml, 400 ml)
Plastic brush
Static mixer

Pipe + tube cutter in application.

Cut the pipes with a tube cutter tool or saw to a right angle

Chamfer pipes with a chamfering tool

Apply the adhesive on the inner side of the fitting using a dispenser and mixer

Dispense adhesive in fitting with plastic brush

Apply adhesive on pipe

Tangit **RAPID**
SOLVENT FREE

THE ONLY

Solvent free, high performance, efficient and gap filling.
Suitable for both PVC-U and PVC-C pipes

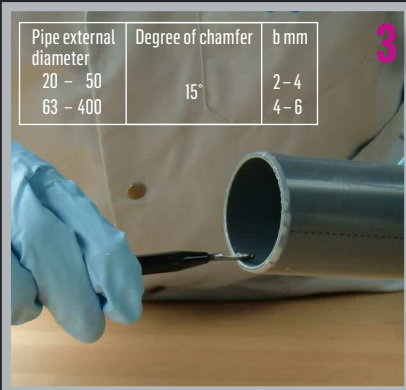

4x faster curing time (in comparison to common Tangit adhesives).
Up to 4 bar per hour at 20°C.

2x longer open time (in comparison to common Tangit adhesives)
up to 8 minutes at 20°C

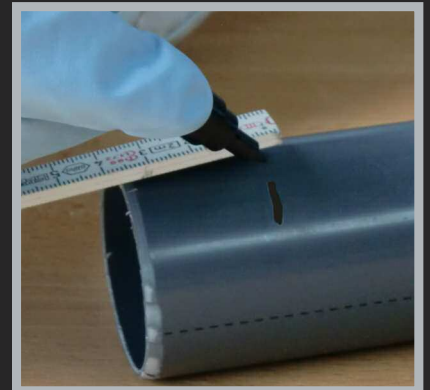

Drinking water approved according to KTW, W270, ACS, WRAS.
Technical approval according to CSTB.

Deburr pipe ends with deburrer

Cleaning of pipe and fitting

Marking of plug-in depth

Dispense adhesive on pipe with plastic brush

Connect pipes and fittings to its full depth without twisting

Adhesive bead can be cleaned or be used as a quality proof

SUSTAINABLE SOLUTION FOR YOUR PVC PIPES.

COMPETENT. GLOBAL. SPECTACULAR.

A strong product deserves a strong partner. With the Swiss Georg Fischer Group, Henkel has competent support in terms of distribution. The leading provider for piping systems made off plastic and metal, is responsible for sales of Tangit pipe adhesive and building connections (M3000). The Georg Fischer Group is your contact partner for technical and business questions.
