To Future Horizons - GF Piping Systems extends relationship with Fincantieri Shipyards

GF Piping Systems has reinforced its position as the preferred provider of flow solutions for fresh water, pools, cooling (HVAC), and wastewater in the marine industry. The strengthened partnership with Fincantieri, one of the world's leading passenger shipbuilders, marks a significant step in their collaboration.

GF Piping Systems remains the leading supplier for hot and cold water, cooling, and ballast water piping systems on all new builds and retrofits at Fincantieri's eighteen shipyards across four continents. The company's more durable, lightweight, corrosion-free Sanipex MT, Instaflex and PE solutions, are designed for high hygiene during operation. As a testament to the collaborative spirit, GF Piping Systems and Fincantieri Shipyards have confirmed their good relationship in a recent meeting, reflecting a shared commitment to mutual growth and success.

"With this partnership we strengthen our position as the marine industry's market leader for water and flow solutions. The depth of our portfolio and our application expertise are the building blocks to create connections for life, like our more than 20-year relationship with Fincantieri Shipyards," says Julian Backes, Head of Sales Marine EMEA, GF Piping Systems.

The extensive solutions portfolio, application know-how, and expertise in design and project execution support Fincantieri's sustainability vision, contributing to its goal of reducing environmental impact and improving naval system efficiency.

Alberto Mazzali, Sales Manager Marine Italy, GF Piping Systems, adds: "Beyond technical solutions, GF Piping Systems prioritizes customer-centric services, including tailored consultations, on-site training, and global technical support. This comprehensive approach confirms our reputation as a trusted partner in the marine industry, ensuring seamless project execution and long-term operational excellence. Together with Fincantieri, we design the future in passenger ship piping."

As the marine industry faces increasing challenges from climate change and stricter regulations, the collaboration between GF Piping Systems and Fincantieri Shipyards exemplifies how strategic partnerships can drive sustainable innovation. Together, they pave the way for greener maritime operations, setting new benchmarks in environmental stewardship and efficiency for the global shipbuilding community.

GF Piping Systems

GF Piping Systems creates connections for life as the superior water and flow solutions provider for industries and infrastructure, enabling the safe and sustainable transport of fluids.

The division focuses on industry-leading leak-free piping solutions and engineering services for numerous demanding end-market segments. Its global sales, engineering, and manufacturing footprint reflects its strong focus on customer-centricity and innovation, and its award-winning portfolio includes fittings, valves, pipes, vaults, chambers, automation, fabrication, and jointing technologies.

GF Piping Systems has its own sales companies in 33 countries and fabrication hubs in 15 countries, which means it is always by its customers' side. Production sites in 40 locations in the Americas, Europe, the Middle East, and Asia ensure sufficient availability and quick, reliable delivery. In 2024, GF Piping Systems generated sales of CHF 1'971 million and employed 8'309 people. GF Piping Systems is a division of Georg Fischer AG (GF), founded in 1802 and headquartered in Schaffhausen (Switzerland).
